To whom it may concern

As a global leader in software industry I would like to express my appreciation of the partnership with ISIC, which we consider to be a unique way to approach and attract students.

Our aim is to enable the students to use Microsoft's products regardless of their financial status. We acknowledge ISIC's rich experience in this field and we welcome the possibility to strengthen our position among the youth with the help of such a reliable and active partner.

Thanks to the online database of valid cardholders, we are able to verify the student status and enable the download of selected Microsoft software for favourable price.

I can confirm that thanks to the co-operation with ISIC, the number of student purchases and downloads increased considerably.
